# Player Substitutions:

Each team is allowed 2 players to be designated as substitutes on their roster. Subs can NOT replace any player of a lower rating. When pulling a sub out, the original player must return to that position in the lineup or be replaced by another sub, if applicable. Subs can NOT be placed in the lineup to play the same opponent more than once in a match.

## Player Eligibility

Fargo established at least 200 games, or rating by the BadBoys staff. WARNING BadBoys will rate non-established players in a way that protects the integrity of the event. This may result in players rated higher than expected. No team may have more than one unestablished player. BadBoys reserves the right to adjust player ratings at any time, and may, at our discretion, rate any entered player higher than their established Fargo.

If you have no fargo, or under 200, you must sign up minimum of 7 days prior to the start of the event.

## Team Eligibility and Penalties

Each individual team player is given a 10 point allowance to cover any fluctuation that may occur after registration. Maximum allowance is 10 points for any single player, exceeding this limit will result in a 1 game penalty for every 10 points over the limit. (Example: A player registers at a 548 and on game day is a 570. The team will incur a 2 game penalty.)

## Dress Code:

Collared shirt, Teams must be Collared and Same Color, No open toed shoes or sandals, No torn jeans, or otherwise distracting clothing. Dress shorts are allowed, however, they must be a solid color. All UNALTERED BadBoys apparel is acceptable, including t-shirts, and does not have to match the team shirt.

## Match Conflicts

In the case of a possible over-lapping schedule, if a conflict arises, the player should notify the tournament desk. Also, players should be tolerant that a match may be held or rescheduled due to conflicts and both players will be notified of the change.

# Forfeit Procedure

If the assigned table is available at the time the match is scheduled to start AND no opponent is present, the player shall call a referee to the table. The referee will verbally callout the missing player's name to verify they are not present and then write down the time. At this point the missing player will be put on a 15 minute clock, and will forfeit the match if they are not there in time. Present player will have to call the referee back to the table after 15 minutes to finalize the forfeit process.

If the assigned table is not available at the time the match is scheduled to start, the player must wait until the current match in progress finishes before calling the ref to the table.

# Rating Reviews

BadBoys will rate non-established players in a way that protects the integrity of the event (See next page.) This may result in players rated higher than expected. No team may have more than one unestablished player. BadBoys reserves the right to adjust player ratings at any time, and may, at our discretion, rate any entered player higher than their established Fargo.

# Disruption of Play

In the event that there is a disruption that causes play to stop (i.e. power outages), all players must check in with the tournament desk before leaving to receive information regarding any rescheduling that may need to be made.

**It's the responsibility of the players to know when their match times are, and to be on time.**

# Low Entry Procedure

Must have a minimum number of 12 entries, or BadBoys reserves the right to combine divisions and reassign races to offset the differences between the two, or more, combined divisions.

# Tournament Integrity Check (TIC)

Fargo states that 200 robustness (games played) are required to reach an established Fargo rating.

BadBoys has developed the following procedure for players without a 200 robustness for the purpose of protecting the Integrity of an event.

## Example:

Tom has a starter rating of 560, with a preliminary rating of 593 after 50 games. The difference between Toms starter and preliminary rating is 33 points.

The chart below shows how we will calculate Tom's TIC Rating:

(In the event that the difference is a negative number, that number will made positive.)

Current Fargo: 593  
Starter Rating: 560  
Robustness: 50  
Difference ("D"): 33

Robustness				Rounded to nearest whole number.	Added to Current Fargo	TIC RATING
0-24	full difference	D	=	33	33+593	626
26-75	75% of difference	D * .75	=	25	25+593	618
76-125	50% of difference	D * .5	=	17	17+593	610
126-175	25% of difference	D * .25	=	8	8+593	601

Tom will be entered into the event as a 618.

The purpose of the TIC Rating is to protect the integrity of the event and lean towards a higher rating until player is established. However, some players that have a starter rating higher than their preliminary rating may request an inquiry from BadBoys to lower their tournament rating due to an overly high starter rating.

BadBoys may chose not to lower a rating due to lack of information or to protect the integrity of the event.

BadBoys reserves the right to set fargos for our tournaments despite starter ratings as we see fit in order to protect the integrity of the tournament.
